

**MAKE EVERY WORKDAY
EARTH DAY**

www.ontario.ca/wastereduction

Chew on this.

Food waste should go back where it came from: the good earth. If your office kitchen doesn't have a dedicated bin, check with management – or take your leftovers home.

Contact building management if you have questions or concerns regarding waste.

DID YOU KNOW food waste sent to landfill will brew methane – and methane is about 20 times more potent a greenhouse gas than carbon dioxide. That's not cool.
